EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Mark Yuan (Reg. Number 57,312) on 08 April 2010.
3. Claim amendments are highlighted (**example**), added language has an underline (**example**) and deleted language has either double brackets ([|ex|]) or strikethrough (**example**).

The application has been amended as follows:

- a. Claim 1: A cache comprising:

a first cache line to store an instruction segment further comprising a plurality of instructions, ~~each instruction of the plurality of instructions is stored~~ in sequential positions of the first cache line in reverse program order, wherein a conditional branch causing program flow to jump from a first location in a first instruction stream to a second location in a second instruction stream causes a terminal instruction from the second instruction stream to be stored in a first position of a second cache line.

- b. Claim 5: A segment cache for a front-end system in a processor, comprising a plurality of cache entries to store instructions of instruction segments, each instruction of an instruction segment is stored in reverse program order in a first cache line, wherein a conditional branch causing program flow to jump from a first location in a first

instruction stream to a second location in a second instruction stream causes a terminal instruction from the second instruction stream to be stored in a first position of a second cache line.

c. Claim 8: A method comprising:

building an instruction segment based on program flow, and
storing instructions of the instruction segment in a cache entry, each instruction of the instruction segment is stored in reverse program order in a first cache line, wherein a conditional branch causing program flow to jump from a first location in a first instruction stream to a second location in a second instruction stream causes a terminal instruction from the second instruction stream to be stored in a first position of a second cache line.

d. Claim 14: A processing engine, comprising:

a front end stage to build and store instruction segments, ~~instructions provided therein~~ each instruction of an instruction segment is stored in reverse program order in a first cache line, wherein a conditional branch causing program flow to jump from a first location in a first instruction stream to a second location in a second instruction stream causes a terminal instruction from the second instruction stream to be stored in a first position of a second cache line, and
an execution unit in communication with the front end stage.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance: The prior art searched and found have not taught the combination of the limitations in the independent claims. More specifically, taking claim 5 as exemplary, the prior art searched and found have not taught, when taken in combination with other limitations in the claim, "each instruction of an instruction

segment is stored in reverse program order in a first cache line, wherein a conditional branch causing program flow to jump from a first location in a first instruction stream to a second location in a second instruction stream causes a terminal instruction from the second instruction stream to be stored in a first position of a second cache line.” The prior art searched and found have not taught storing a plurality of instruction in reverse order in a cache line and storing a terminal instruction from a second instruction stream in the first position of a second cache line when a conditional branch causes program flow to jump from a first location in a first instruction stream to a second location in the second instruction stream.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to AIMEE J. LI whose telephone number is (571)272-4169. The examiner can normally be reached on M-T 7:00am-4:30pm.
